SKEEEEEE

I mixed mandragora roots, some of the original poison (from obsidian spider's liver, to produce antibodies), attribute-converting mana stones, and medicinal herbs' condensate into a liquid base, and used a dwarf-made dragon fang needle to inject it into Reszurre's shoulder. It took me two days to collect everything, but, probably thanks to Monet and Anne's care, she was holding up well.

Leave her to us!

The antidote requires a few ingredients that can only be found out in the wild. I asked Monet and Monet's mother, Anne, to look after Reszurre while I would be out. Reluctantly, I also told them what to do in case her condition suddenly deteriorated.

ooze...

drip...

PRICK

HAAH... HAAH...

Reszurre-san... Just wait a bit longer... You'll get better soon.
